APS Employee Census results are a rich source of workplace information, and action planning is how these results and data are mobilised.

Consider using the guide on the next page to begin your approach to taking action on your Census results.

Time to take action

Identify areas to celebrate, areas which you need to investigate further and opportunities for improvement. Prioritise 3 areas to take forward.

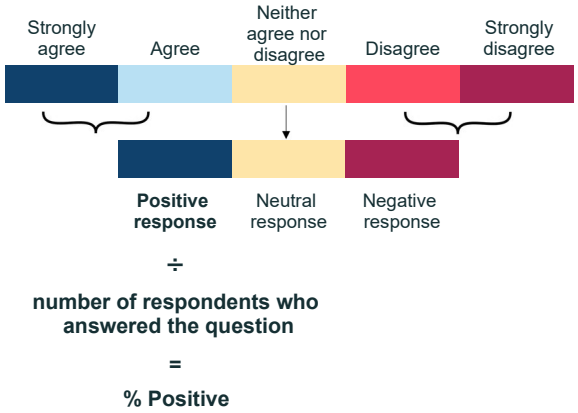

Celebrate	Investigate further with our teams	Opportunities
What things do we do well?	Are there any other opportunities coming out of the results that we want to explore further?	Areas we need to focus on and turn into action plans:
Think about how we can build on our strengths and learn from what we are good at.	How could we investigate? Through looking at the data in more detail or through discussions with staff?	What are the key things we need to improve to make working here better?

Guide to this report

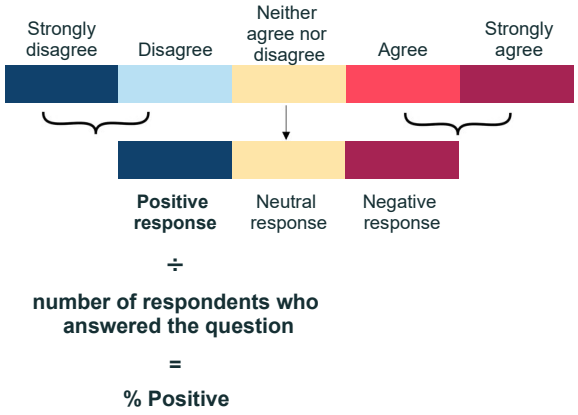

% Positive Score calculation

Where results are shown as positive percentages (% positive), these are calculated by adding together positive responses ("strongly agree" + "agree" or "always" + "often") and dividing by the number of respondents who answered the question.

Reverse Scored questions

For some questions, agreement with the question indicates an unfavourable outcome. For example, agreeing with the question "*I feel burned out by my work*".
In these instances, % Positive is calculated by adding together 'strongly disagree' + 'disagree' responses.

Calculation of index scores

The questions that comprise each index are asked on a five-point scale. To calculate a respondent's index score, their answers are recoded to fall on a scale between 0 and 100 (i.e. coded as 0, 25, 50, 75 or 100) and then averaged across all questions.

Index scores of individual respondents are combined and averaged to form a group score.

Rounding

Results are presented as whole numbers for ease of reading, with rounding performed at the last stage of calculation for maximum accuracy. Values from x.00% to x.49% are rounded down and values from x.50% to x.99% are rounded up. Therefore, in some instances, results may not total 100%.

Anonymity

It is best practice not to display the results of groups of respondents to the extent where the anonymity of individuals may be compromised.
Results will not be shown where there are less than 10 respondents in a group.

Comparisons to previous years

The method of analysing and reporting specific results may be periodically reviewed and revised. Such improvements are applied to current data and that of previous years. For this reason, the current report is always the most accurate data source for APS Employee Census results, including comparisons with time series data.
